

5-Minute Morning Mobility Routine

Wake Up Your Body, Boost Your Energy

Start your day with this quick routine to improve flexibility, reduce stiffness, and prepare your body for movement.

The Routine (60 seconds per move)

1. **Neck Circles:** Gently roll your head in a circular motion. 30s clockwise, 30s counter-clockwise.
2. **Shoulder Rolls:** Roll your shoulders up, back, and down. Focus on opening your chest.
3. **Cat-Cow Stretch:** On hands and knees, arch your back towards the ceiling (Cat), then drop your belly and look up (Cow).
4. **World's Greatest Stretch:** From a lunge position, place the opposite hand on the floor and rotate your other arm towards the sky. Switch sides after 30s.
5. **Bodyweight Squats:** Slow and controlled squats to wake up your lower body and joints.

Benefits

- Increases blood flow to muscles.
- Improves joint range of motion.
- Reduces morning stiffness and "brain fog".
