

12-Week Home Gym Program

Level Up Your Strength at Home

Introduction

Ready to move past the basics? This 12-week program is designed for intermediate trainees with access to minimal equipment (dumbbells or kettlebells and a bench). We use progressive overload to ensure you keep getting stronger.

Equipment Needed

- A set of adjustable dumbbells or a selection of kettlebells.
- A sturdy bench or chair.
- Resistance bands (optional but recommended).

Phase 1: Foundation (Weeks 1-4)

Focus on perfect form and consistent tempo.

- **Workout A:** Goblet Squats, DB Bench Press, DB Rows, DB Overhead Press.
- **Workout B:** Romanian Deadlifts, Push-ups, Lunges, Plank.

Phase 2: Hypertrophy (Weeks 5-8)

Increase volume and decrease rest time.

- Adding isolation movements (Lateral Raises, Bicep Curls, Tricep Extensions).

Phase 3: Strength & Power (Weeks 9-12)

Increase weight/resistance and focus on explosive movement.

Tracking Progress

Keep a log of every set, rep, and the weight used. Your goal is to beat your "previous self" every single week.
